Profile

Industrial designer with 10+ years in product design and development — taking products from concept and 3D modelling through to production, and producing the visual and marketing assets that support them. Recently focused on AI-assisted workflows for product renders and promotional content, and on designing and building digital products — including an iOS app live on the App Store and client websites.

- **Product design & development** — end-to-end: concept, 3D modelling, CMF, production liaison.
- **3D & visuals** — product renders, CMF presentation and marketing assets.
- **AI-assisted workflows** — generative imagery, product visuals and digital product development.
- **Front-end application design (FDD)** — turning interface design into working websites and apps; an emerging design-plus-build hybrid skill.

Experience

Founder & Designer

Studio Nestir · Independent design practice · 2022 – present (remote; UK & HK)

- End-to-end product design & development for consumer electronics (soundbars, headphones, gaming TWS earphones, gaming mice & keyboards) — concept, 3D modelling, CMF and production liaison.
- High-efficiency 3D concept and detail renders for client marketing and deal confirmation; built 6+ new manufacturing client connections in 11 months.
- Client websites designed and built end-to-end (Café Chico, Ono Inspiration).
- Leading the practice's adoption of AI and digital tools — product visuals, promotional content, and AI-assisted development of digital products (see AI & Digital Practice).

Production Operative

VN Labs (Supreme Imports group) · The Hive, Trafford Park, Manchester · May 2024 – present

- Operating packaging machinery on a food production line — filling powder products into pouches and tubs; completing production sheets and orders.
- Maintaining strict hygiene standards; manual handling of heavy barrels, pallets and boxes.
- Reliable and flexible under pressure in a fast-paced environment; hands-on knowledge of the group's operations, quality standards and process discipline.

Industrial Designer

E-Blue International Corp. · Hong Kong · Sep 2016 – Aug 2019

- In-house design for gaming products — from concept, 3D modelling and renders through to production support.
- Gaming stadium interiors (decoration & furniture) — produced design solutions and interior renders, presented to clients and cooperation partners, helping to secure orders.
- Balanced creative design against real-world constraints — time, cost, mechanical structure and price.
- Worked closely with the China factory and engineering teams through the stadium build's evolution — from wood construction to thermoforming.
- Assisted the design department's transition from Rhino + KeyShot to a full Blender workflow (completed within six months).

Eyewear Craftsman (part-time)

Madebyavision Ltd. · Hong Kong · Sep 2018 – Aug 2019

- Bespoke eyewear: shape design, tooling, acetate trimming, hand polishing and CNC operation.
- Preparation of digital drawings and production documentation.

Industrial Designer

Tinson International Ltd. · Hong Kong · Aug 2014 – May 2016

- Kitchen appliances and household products (melamine dinner sets, children's sets).
- Injection moulding and sheet-metal development; collaboration with China factories including site visits.

Eyewear Designer

Wah Ming Optical Manufactory Ltd. · Shenzhen, China · Sep 2012 – Apr 2014

- In-house collections and fashion brand series; international eyewear mixing fashion and luxury elements.
- New structure and material development; line and material combinations.

AI & Digital Practice

2024 – present

- Receipt Folder SN — iOS app (live on the App Store) — designed, developed and shipped; receipt management app. [View on the App Store](#)
- Further app projects — several additional apps in development and being prepared for release.
- Client websites — designed and built for hospitality and retail clients (Café Chico; Ono Inspiration).
- AI production workflows — product renders, mockups and promotional materials using AI image generation (ComfyUI, Nano Banana Pro, MiniMax image-01); AI-assisted development of digital products; integrating AI tools into established design pipelines (Blender, Rhino / KeyShot, Affinity).
- Ongoing research and experiments in AI-assisted design, local models and digital product development.

Software & Tools

Design Blender · Rhino · KeyShot · Plasticity · SolidWorks · AutoCAD · Affinity Designer · Adobe Illustrator · Photoshop

Programming & digital Python · Swift / SwiftUI (Xcode) · HTML / CSS / JavaScript · Flutter (working knowledge) · Blender Python scripting · Git / GitHub

Local AI models LM Studio · Ollama · llama.cpp · GGUF / MLX models (Hugging Face) · ComfyUI (local image generation)

AI agents & developer tools Hermes Agent (self-hosted) · Claude Code · OpenAI Codex · Windsurf · MCP tool integrations

AI-assisted design workflows generative AI integrated into established software pipelines (Blender, Rhino / KeyShot, Affinity) for concept, rendering, materials and visualisation

Education

Interior Design (Certificate) — Hong Kong College of Technology · 2016

Higher Diploma in Life Style Product Design — Hong Kong Design Institute · 2009–2012

Subject: product design concept

Diploma in CAD/CAM Engineering — Vocational Training Council, Hong Kong · 2006–2009

Subjects: mechanical foundation, 3D modelling, technical drawing, manufacturing knowledge

Additional

- Languages: English · Cantonese · Mandarin
- Driving licence B, BE · Full right to work in the UK (BNO visa)
